Re: Stress Saver 370 and FDA Compliance

To whom it may concern,

The FDA does not have a method to test composite gaskets such as the Stress Saver® 370. However both the EPDM and PTFE used in the Stress Saver® 370 are FDA compliant. This makes it suitable for use in food processing and pharmaceutical applications.

Please feel free to contact Applications Engineering should you require anything further.

Sincerely,

John Crandall
Applications Engineer
